

Digital Storytelling Discussion: Listen to one of the stories from the under-told stories website, <https://www.undertoldstories.org/>, and write a 300-word discussion post about how the story uses technology to communicate its message. Talk about whether it was effective use of technology and discuss what other digital tools from those we learned about this week you might use to communicate the story and why those technologies would be effective. Also touch on your evaluation of how the story is organized and displayed on the larger site.
